

DAVID ABRIL

QA Automation Engineer | English C2

Bogotá, Colombia

PROFESSIONAL SUMMARY

QA Engineer with backend development foundations and multi-industry leadership. I design scalable test architectures, build CI/CD-integrated frameworks, and use predictive forecasting to improve engineering velocity and operational efficiency.

I have:

- Reduced go-live timelines by 43%
- Automated 11 complex workflows eliminating 140,000+ manual DOM interactions
- Saved 150+ immediate engineering hours across backlog of websites
- Built CI/CD pipelines delivering production-ready artifacts automatically
- Designed secure backend data systems with multi-layer encryption in database
- Led technical and non-technical teams across technology, BPO, and tourism sectors

My differentiator: I combine deep technical automation engineering with operational leadership and systems thinking.

CORE EXPERTISE

Automation & Quality Engineering

Playwright · Cypress · Puppeteer · API Testing · GraphQL ·

SQL/MySQL · MongoDB · UI/E2E

Automation · Backend Validation · Accessibility Testing · Performance Testing · Security

Testing · BDD/Gherkin

Development

JavaScript · TypeScript · Java · C# · SQL · HTML · CSS · React · Node.js

EXPERIENCE:

Role: Website Migration Team Lead & Automator at Nationwide Marketing Group (2025–2026)

Led a multi-department international team migrating U.S. retailer e-commerce websites from a legacy platform to a secure modern architecture.

Key Achievements & Responsibilities:

Reduced design-to-go-live timelines by 43% using predictive forecasting models that factor project complexity, revision cycles, and team capacity without lowering team morale or satisfaction by relying on AI and automations rather than manual work.

Built a year-long performance forecasting model to predict migration duration and optimize hiring strategy.

Collaborated daily with Management, Developers, Designers, QA Engineers, and CAMs to align migration roadmap with revenue and performance objectives.

Oversaw bug escalations, feature prioritization, and cross-functional planning.

Contributed to hiring decisions and trained new team members.

Keywords for retrieval:

forecasting, migration leadership, e-commerce platform migration, cross-functional leadership, bug escalation management.

Role: E-Commerce Website Migrator at Nationwide Marketing Group (2024–2025)

Migrated U.S. retailer websites using:

HTML, CSS, JavaScript, Responsive design best practices and SEO optimization.

Recognized for highest migration conversion rate on team.

Improved mobile responsiveness and modernized legacy HTML/CSS/JS systems into scalable environments.

Keywords for retrieval:

HTML migration, responsive development, SEO improvement, website conversion optimization

Role: Real Time Analyst, Workforce Management at
Sitel Digital Services for (PayPal / Venmo) (2020–2021)

Used advanced Excel and IEX Workforce Management tools to:

Monitor real-time queue volumes, Track schedule adherence, Manage shrinkage and roster preparation, Generate heavy operational reports and work directly with PayPal (Venmo) operational teams in a BPO environment.

Keywords for retrieval:

PayPal, Venmo, BPO, Workforce Management, Real Time Management, IEX, Excel reporting, queue monitoring

Role: VIP Private Tours Manager at Gran Colombia Tours
(2017–2024)

Designed and directed private tour operations.

Managed simultaneous bilingual (English & Spanish) tour operations.

Led logistics for FC Barcelona Legends visit in Bogotá.

Coordinated with local police and private security.

Role: Tour Guide at Gran Colombia Tours (2021–2024)

Worked with VIP international travelers across Colombia, developing communication, client management, and cultural storytelling expertise.

Keywords for retrieval:

VIP tour manager, logistics coordination, bilingual leadership, tourism operations management

Role: Tier 2 Technical Support & Team Manager at Teleperformance (Sprint & Comcast USA) (2014–2017)

Promoted to Sprint USA RESQ escalation team.

Managed complex multi-call escalations requiring resolution within 30 days.

Built long-term business-to-client relationships.

Served as Backup Supervisor of a 15-member team.

Provided floor support managing sensitive multi-account information.

Certified with 108-hour JUMP Supervisor Career Plan (emotional intelligence & leadership training).

Worked on Sprint USA and Comcast USA technical support accounts.

Keywords for retrieval:

Sprint USA, Comcast USA, Tier 2 support, escalation management, team leadership, supervisor, telecom support

Role: Backend Software Developer at Revista Credencial (2014)
(Java + SQL)

Built a secure banking data transformation system using:

Java,SQL,Direct database-level queries, 3-layer security architecture and role-based data visibility.

Pipeline architecture:

Decrypt → Transform → Filter by Department → Re-encrypt → Return to Bank

Handled sensitive financial data securely.

Keywords for retrieval:

Java backend, SQL database queries, encryption pipeline, banking data processing, secure architecture

EDUCATION & CERTIFICATIONS

Analysis & Development of Computer Software Diploma

QA Automation Engineer Certification

Azure DevOps CI/CD Certification

Software Quality Assurance Bootcamp

Fundamentals of Software Testing

EF SET English Certification – C2

WHAT MAKES ME STAND OUT

I engineer automation systems that:

- Scale
- Reduce operational friction
- Improve delivery velocity
- Protect system integrity
- Align engineering with business objectives

I combine:

Technical depth

Operational forecasting

Cross-functional leadership

Security-first thinking

CI/CD discipline

Automation architecture design

I don't just test systems.

I build systems that improve how teams deliver.
